No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 3, Application US/08316239B
Patent No. 5679509
GENERAL INFORMATION:
APPLICANT: Wheelar, Cosette M.
APPLICANT: Wheelar, Cheryl A.
TITLE OF INVENTION: Distinguishing a Subset of HPV that is Associated with an TITLE OF INVENTION: Increased Risk of Developing Cervical Dysplasia and TITLE OF INVENTION: Cervical Cancer
NUMBER OF SEQUENCES: 4
CORRESPONDENCE ADDRESS:
ADDRESSE: Jagtiani & Associates
STREET: G126 Rocky Way Court
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         ö
                                                                                                                                                                                                                        APPLICANT: CHOPPIN, JEANNINE

## APPLICANT: MAILLER Sandra
## APPLICANT: Jean-Gerard
## TITLE OF INVENTION: MAILLER of peptides derived from E6 and/or E7
## TITLE OF INVENTION: MAILLER SOUS-10-04
## PILE REFERENCE: 45636-5071-US
## CURRENT APPLICATION NUMBER: DET/FR02/01533
## PRIOR APPLICATION NUMBER: PR 01 05980
## PRIOR PAPLICATION NUMBER: FR 01 05980
## PRIOR PAPLICATION NUMBER: FR 01 05980
## PRIOR PAPLICATION NUMBER: FR 01 05980
## PRIOR FILING DATE: 2002-05-04
## NUMBER OF SEQ ID NOS: 63
## SEQ ID NO 20
## SEQ ID NO 20
## LENGTH: 15

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       Description

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              ö
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   236544

B6 protein - human papillomavirus type 26
C;Species: human papillomavirus type 26
C;Species: human papillomavirus type 26
C;Spacesion: S36544
B;Delius, H.; Hofmann, B.
Bubmitted to the EMBL Data Library, August 1993
A;Description: Primer-directed sequencing of human papillomavirus types.
A;Reference number: S36469
